TEHNOLOGIJE

DOKUMENTACIJA

Web programiranje 2

Student:

Jovan Vićentijević 109/23

Projekat: TechGear Hub TechGear Hub je interaktivna veb prodavnica specijalizovana za gejmersku i profesionalnu IT opremu. Glavni cilj ove aplikacije je da korisnicima pruži moderno, brzo i intuitivno iskustvo prilikom pretrage, odabira i naručivanja tehnoloških uređaja.

Korišćene tehnologije i biblioteke:

- **Struktura i dizajn:** Veb stranice su kreirane koristeći **HTML5** i **CSS3**, dok je za postizanje responzivnosti (prilagođavanja svim veličinama ekrana) implementiran **Bootstrap 5** radni okvir. Vizuelni prikaz upotpunjen je **FontAwesome** ikonicama.
- **Logika i interaktivnost:** Za sve klijentske funkcionalnosti, manipulaciju DOM elementima i obradu događaja korišćen je **JavaScript** zajedno sa **jQuery** bibliotekom.
- **Skladištenje i prenos podataka:** Asinhrono povlačenje informacija vrši se pomoću **AJAX** zahteva koji komuniciraju sa **JSON** datotekama. Za pamćenje korisničke korpe između sesija ugrađen je klijentski **Local Storage**.

Detaljan pregled funkcionalnosti:

- Aplikacija se snažno oslanja na dinamičko renderovanje sadržaja. Glavni navigacioni meni se u potpunosti ispisuje pomoću JavaScript-a, a unutar njega se nalazi pametni bedž (brojač) koji u realnom vremenu oslikava broj proizvoda koje je korisnik ubacio u korpu.
- Na početnoj stranici (index.html) ističe se automatski *hero slider* koji menja fotografije svake 3 sekunde pomoću *fade* efekta, kao i sekcija "Top Picks" koja iz JSON baze izdvaja i prikazuje samo određene, preporučene proizvode.
- Stranica prodavnice (shop.html) omogućava prikaz kompletne ponude koja se asinhrono učitava iz products.json fajla. Opremljena je naprednim sistemom za filtriranje (po brendovima i vrsti proizvoda) i sortiranje (po ceni rastuće/opadajuće i abecedno). Zbog bolje preglednosti, lista artikala je podeljena pomoću paginacije. Proizvodi se odatle mogu direktno dodati u

korpu, a svako dodavanje je ispraćeno diskretnim *Toast* obaveštenjem.

Stranica `cart.html` daje jasan pregled svih odabranih proizvoda sa mogućnošću interaktivne promene količina, uklanjanja predmeta i automatskog preračunavanja ukupne cene.

Prilikom posete stranici `checkout.html`, korisnika čeka forma zaštićena detaljnom klijentskom validacijom. Ukoliko se korisnik spusti niže na stranici, pojavljuje se uvek dostupno "Back to top" dugme za glatki povratak na vrh.

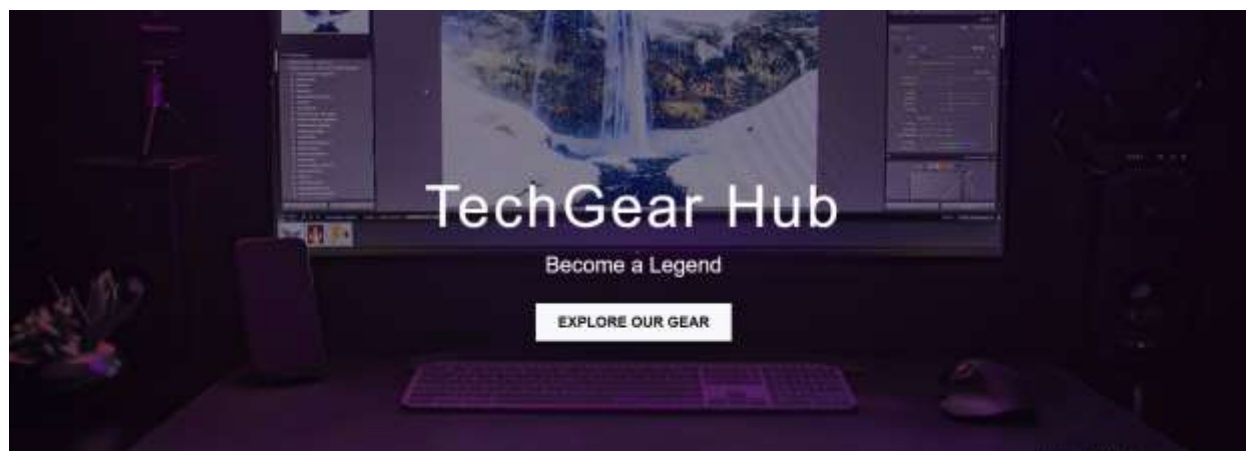

Način upotrebe AJAX-a i JSON-a:

- Sve informacije o artiklima (naziv, slika, cena, brend, ocena) izolovane su u `products.json` datoteci. Prilikom učitavanja stranice, kroz `$(document).ready()` aktivira se inicijalizacija aplikacije i pokreće se `$.ajax` zahtev. Ovaj asinhroni poziv dohvata podatke sa lokalnog servera bez osvežavanja sajta i direktno ih prosleđuje JavaScript funkcijama koje su zadužene za obradu, filtriranje i konačno ubacivanje generisanog HTML-a na samu web stranicu.

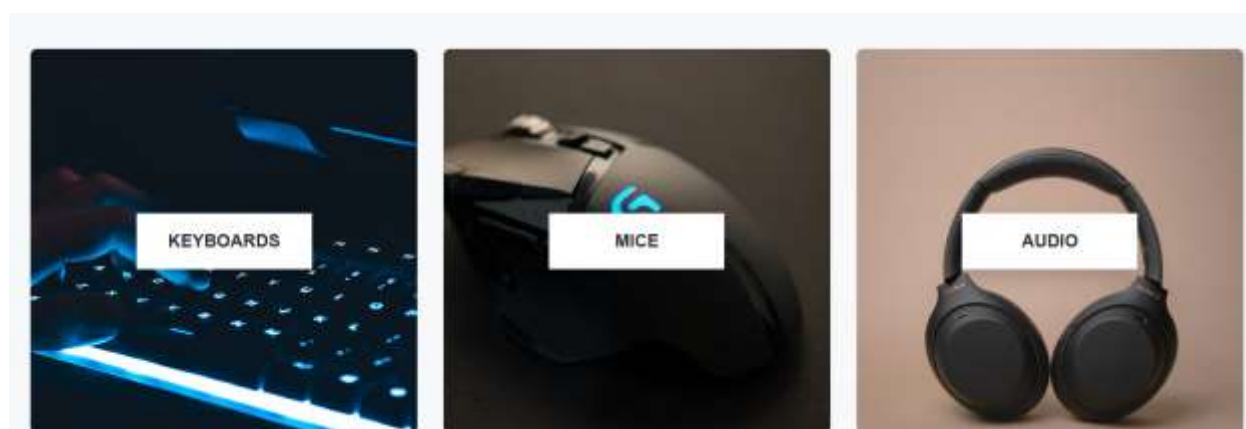

Sistem validacije forme (Checkout):

- Validacija se oslanja na seriju regularnih izraza koji detaljno analiziraju unose. Implementirane su provere za validan format email adrese, telefonskog broja, formatiranja imena, kao i fleksibilan *Regex* za uličnu adresu. *Dropdown* meni za način plaćanja proverava se da li je korisnik napravio konkretan izbor umesto podrazumevane vrednosti. Ukoliko korisnik pogreši, ispisuju se specifične poruke o grešci (crvenim slovima) tik ispod nevalidnog polja. Kada je forma u potpunosti i tačno ispunjena, podaci o korpi se brišu, forma se automatski prazni, a posetiocu se u uglu ekrana prikazuje animirana poruka o uspešnoj narudžbini.

Dinamicki generisan navigacioni meni

Dinamički prikaz slika učitanih iz JSON datoteke, sa automatskom smenom na svake 3 sekunde.

Implementiran je sistem dinamičkog ispisa kategorija iz JSON datoteke koji, putem prosleđivanja URL parametara, omogućava automatsko markiranje odgovarajućeg filtera i prikaz srodnih proizvoda odmah po prelasku na shop stranicu.

What We Offer

From high-performance mechanical keyboards to ergonomic precision mice.

[READ MORE](#)

Sekcija koristi asinhrono učitavanje vizuelnog sadržaja iz JSON datoteke i interaktivnu JavaScript funkciju koja omogućava dinamičko proširivanje teksta klikom na dugme, čime se poboljšava preglednost i angažovanost korisnika.

Default Sorting ▼

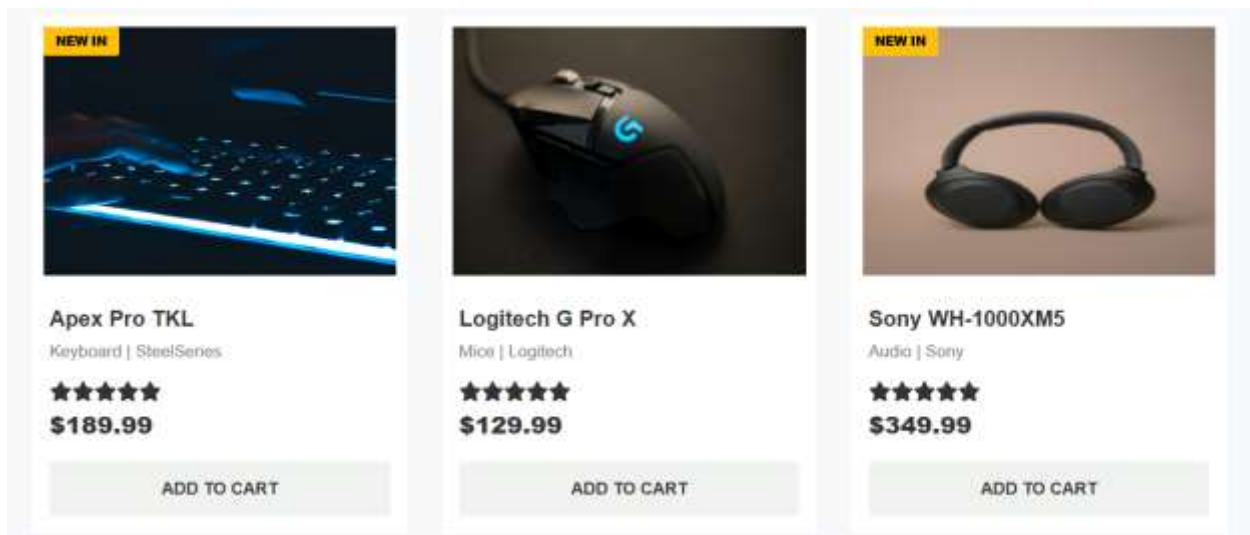

Kategorije

- ☐ Keyboard
- ☐ Mice
- ☐ Audio
- ☐ Monitors

Brendovi

- ☐ SteelSeries
- ☐ Logitech
- ☐ Sony
- ☐ Razer
- ☐ HyperX
- ☐ Apple
- ☐ Glorious
- ☐ Keychron
- ☐ Corsair
- ☐ Samsung

Korisnički interfejs za filtriranje i sortiranje omogućava dinamičku pretragu kataloga u realnom vremenu kroz sinhronizovanu manipulaciju JSON podacima i automatsko ažuriranje DOM-a bez osvežavanja stranice.

Prikazani artikli se dinamički generišu iz JSON baze podataka korišćenjem JavaScript forEach petlje, koja automatizuje iscrtavanje kartica sa informacijama o ceni, rejtingu i statusu proizvoda, uz integraciju funkcionalne korpe za kupovinu.

Sistem paginacije dinamički proračunava broj stranica na osnovu ukupnog broja filtriranih artikala i definisanog limita po strani, omogućavajući korisniku laku navigaciju kroz katalog bez preopterećenja interfejsa podacima.
